

New Markets Tax Credits

Census Tracts Eligible for Investment in the Greater Quad Cities Area

On May 1, 2012, the Community Development Financial Institutions Investment Fund (CDFI) released updated Low-Income Community eligibility data for the New Markets Tax Credit Program based on income and poverty data provided by the Census Bureau's 2006-2010 American Community Survey (ACS) for the 2010 census tracts. Community Development Entities (CDEs) will be able to use the 2006-2010 ACS eligibility data to determine if Qualified Low Income Community Investments (QLICs) are located in NMTC-eligible 2010 census tracts.

The CDFI Fund recognizes that CDEs may have already begun to structure potential QLICs based on the 2000 census data. As a result, the CDFI Fund will allow current NMTC allocates to use either 2000 census data or 2006-2010 ACS data applied to the 2010 census tracts to qualify QLICs closed between May 1, 2012 and June 30, 2013.
